

NORTOOL™

PRECISION MACHINING & TOOL

NORTOOL has the ability to meet your needs and deadlines whether it's machining or tooling, short run or high volume production.

NORTOOL is a division of Norco Industries, established in 1964. We have been designing and fabricating tools and dies and machining parts for Norco's manufacturing operations since 1991.

Nortool has invested in Cimatron E, a state of the art software package, for our CNC software solution. We use a wide array of solid modeling and surfacing tools to design and manufacture tools and dies. We can efficiently handle any job from simple 2D to complex 4-axis machining.

Our CNC equipment provides us with the competitive advantage needed to provide you with high quality precision work that meets your unique production or tooling needs.

If **lead time** is important to you, **talk to us!**

The **LEADWELL MCV-2000i** is capable of 4-axis milling of large parts up to 40" x 80". Onboard 30-tool changer makes this machine great for both long or short runs.

The **Fanuc Robocut Wire EDM** is a submersible wire that features quicker cut times and higher accuracy. Perfect for die details and parts that require tight clearances.

Samsung SL25BMC features a machining length of 40" between centers, an onboard 12-Tool changer, and a 14-3/8" max. outer diameter cutting area.

COMPLETE EQUIPMENT LIST:	
(4) CNC Mills Up to 40" x 80" Part Size	(3) Manual Lathes Up to 100" Between Centers
(1) CNC Lathe 40" Between Center 14-3/8" Max O.D. Cutting Area	(2) Radial Arm Drill Presses Up to 6' Swing
(1) Wire EDM Max Piece Size 10" x 15-3/4" x 23-5/8" 30° Max Taper	(6) Surface grinders Up to 12" x 60" Travel
(5) Manual Mills 20" x 40" Travel w/Digital Readout	(1) O.D. Grinder 10" Between Centers
	(1) Jig Grinder 10" x 16" Travel

We have a wide array of other equipment to meet your machining and tooling needs.

We also operate a high production E-Coat line. We can accommodate many part configurations, and are equipped to provide custom racking to meet your needs.

Our 3 available Laser Machines have a 4' x 8' bed and a maximum speed of 6,000 inches per minute. They'll get the job done with speed and accuracy.

With the support and backing of Norco Industries, Nortool assembled a team of professionals who have specialized in many different areas of the machining trade, including tool and die work, gauge work, and production machining. By bringing all of this knowledge and experience together, we will confidently complete your jobs to your specifications and deliver them on time. For additional information call **574-262-3400** and ask for **Robert Gray**.
